

JURISDICTIONAL DETERMINATION
U.S. Army Corps of Engineers

Revised 8/13/04

DISTRICT OFFICE: NEW YORK DISTRICT (CENAN)
FILE NUMBER: NAN-2006-03022-WCO

PROJECT LOCATION INFORMATION:

State: New York
County: Jefferson
Center coordinates of site (latitude/longitude): lat: 44.055 lon: -75.808
Approximate size of area (parcel) reviewed, including uplands: 129.24 acres
Name of nearest waterway: various unnamed tributaries to Pleasant Creek
Name of watershed: St. Lawrence River

JURISDICTIONAL DETERMINATION

Completed: Desktop determination ☐ Date:
Site visit(s) ☒ Date(s): 2 Nov 05, 3 Nov 05, 4 Nov 05, 19 June 06, 21 June 06,
and 15 May 07

Jurisdictional Determination (JD):

☐ Preliminary JD - Based on available information, ☐ *there appear to be* (or) ☐ *there appear to be no* "waters of the United States" and/or "navigable waters of the United States" on the project site. A preliminary JD is not appealable (Reference 33 CFR part 331).

☒ Approved JD - An approved JD is an appealable action (Reference 33 CFR part 331).
Check all that apply:

☐ *There are* "navigable waters of the United States" (as defined by 33 CFR part 329 and associated guidance) within the reviewed area. Approximate size of jurisdictional area: .

☒ *There are* "waters of the United States" (as defined by 33 CFR part 328 and associated guidance) within the reviewed area. Approximate size of jurisdictional area: 15.27 acres

☒ *There are* "isolated, non-navigable, intra-state waters or wetlands" within the reviewed area.

☒ Decision supported by SWANCC/Migratory Bird Rule Information Sheet for Determination of No Jurisdiction.

BASIS OF JURISDICTIONAL DETERMINATION:

A. Waters defined under 33 CFR part 329 as "navigable waters of the United States":

☐ The presence of waters that are subject to the ebb and flow of the tide and/or are presently used, or have been used in the past, or may be susceptible for use to transport interstate or foreign commerce.

B. Waters defined under 33 CFR part 328.3(a) as "waters of the United States":

☐ (1) The presence of waters, which are currently used, or were used in the past, or may be susceptible to use in interstate or foreign commerce, including all waters which are subject to the ebb and flow of the tide.

☐ (2) The presence of interstate waters including interstate wetlands¹.

☐ (3) The presence of other waters such as intrastate lakes, rivers, streams (including intermittent streams), mudflats, sandflats, wetlands, sloughs, prairie potholes, wet meadows, playa lakes, or natural ponds, the use, degradation or destruction of which could affect interstate commerce including any such waters (check all that apply):

☐ (i) which are or could be used by interstate or foreign travelers for recreational or other purposes.

☐ (ii) from which fish or shellfish are or could be taken and sold in interstate or foreign commerce.

☐ (iii) which are or could be used for industrial purposes by industries in interstate commerce.

☐ (4) Impoundments of waters otherwise defined as waters of the US.

☒ (5) The presence of a tributary to a water identified in (1) - (4) above.

☐ (6) The presence of territorial seas.

☒ (7) The presence of wetlands adjacent² to other waters of the US, except for those wetlands adjacent to other wetlands.

Rationale for the Basis of Jurisdictional Determination (applies to any boxes checked above). *If the jurisdictional water or wetland is not itself a navigable water of the United States, describe connection(s) to the downstream navigable waters. If B(1) or B(3) is used as the Basis of Jurisdiction, document navigability and/or interstate commerce connection (i.e., discuss site conditions, including why the waterbody is navigable and/or how the destruction of the waterbody could affect interstate or foreign commerce). If B(2, 4, 5 or 6) is used*

as the Basis of Jurisdiction, document the rationale used to make the determination. If B(7) is used as the Basis of Jurisdiction, document the rationale used to make adjacency determination: The wetlands on the site abut, or are adjacent to various unnamed tributaries to Pleasant Creek. Pleasant Creek is a tributary to the Indian River. The Indian River, via Black Lake and a section of the Oswegatchie River, is a tributary to the St. Lawrence River, which is a navigable waterway.

Lateral Extent of Jurisdiction: (Reference: 33 CFR parts 328 and 329)

- | | |
|---|---|
| <input checked="" type="checkbox"/> Ordinary High Water Mark indicated by:
<input checked="" type="checkbox"/> clear, natural line impressed on the bank
<input type="checkbox"/> the presence of litter and debris
<input checked="" type="checkbox"/> changes in the character of soil
<input checked="" type="checkbox"/> destruction of terrestrial vegetation
<input type="checkbox"/> shelving
<input checked="" type="checkbox"/> other: defined bed and banks | <input type="checkbox"/> High Tide Line indicated by:
<input type="checkbox"/> oil or scum line along shore objects
<input type="checkbox"/> fine shell or debris deposits (foreshore)
<input type="checkbox"/> physical markings/characteristics
<input type="checkbox"/> tidal gages
<input type="checkbox"/> other: |
|---|---|

- ☐ Mean High Water Mark indicated by:
 ☐ survey to available datum; ☐ physical markings; ☐ vegetation lines/changes in vegetation types.

- ☒ Wetland boundaries, as shown on the attached wetland delineation maps and/or in a delineation report prepared by:
 The GIS component of the ITAM Program and Environmental Division, Fort Drum, NY

Basis For Not Asserting Jurisdiction:

- ☐ The reviewed area consists entirely of uplands.
☐ Unable to confirm the presence of waters in 33 CFR part 328(a)(1, 2, or 4-7).
☐ Headquarters declined to approve jurisdiction on the basis of 33 CFR part 328.3(a)(3).
☐ The Corps has made a case-specific determination that the following waters present on the site are not Waters of the United States:
 ☐ Waste treatment systems, including treatment ponds or lagoons, pursuant to 33 CFR part 328.3.
 ☐ Artificially irrigated areas, which would revert to upland if the irrigation ceased.
 ☐ Artificial lakes and ponds created by excavating and/or diking dry land to collect and retain water and which are used exclusively for such purposes as stock watering, irrigation, settling basins, or rice growing.
 ☐ Artificial reflecting or swimming pools or other small ornamental bodies of water created by excavating and/or diking dry land to retain water for primarily aesthetic reasons.
 ☐ Water-filled depressions created in dry land incidental to construction activity and pits excavated in dry land for the purpose of obtaining fill, sand, or gravel unless and until the construction or excavation operation is abandoned and the resulting body of water meets the definition of waters of the United States found at 33 CFR 328.3(a).
☒ Isolated, intrastate wetland with no nexus to interstate commerce.
☐ Prior converted cropland, as determined by the Natural Resources Conservation Service. Explain rationale:
☐ Non-tidal drainage or irrigation ditches excavated on dry land. Explain rationale:
☐ Other (explain):

DATA REVIEWED FOR JURISDICTIONAL DETERMINATION (mark all that apply):

- ☒ Maps, plans, plots or plat submitted by or on behalf of the applicant.
☒ Data sheets prepared/submitted by or on behalf of the applicant.
 ☒ This office concurs with the delineation reports, dated 13 Dec 06 for the 10100 Barracks sites, and dated 18 Dec 06 for the 1st BCT and 3rd BCT sites, prepared by (company): Environmental Division, Fort Drum, NY
 ☐ This office does not concur with the delineation report, dated , prepared by (company):
☐ Data sheets prepared by the Corps.
☐ Corps' navigable waters' studies:
☐ U.S. Geological Survey Hydrologic Atlas:
☐ U.S. Geological Survey 7.5 Minute Topographic maps: Round Lake, NY
☐ U.S. Geological Survey 7.5 Minute Historic quadrangles:
☒ U.S. Geological Survey 15 Minute Historic quadrangles: Fort Drum Installation Map, prepared by the Defense Mapping Agency
☒ USDA Natural Resources Conservation Service Soil Survey: Jefferson County, NY
☒ National wetlands inventory maps: prepared by the GIS component of the ITAM Program and Environmental Division, Fort Drum, NY
☐ State/Local wetland inventory maps: Round Lake, NY
☐ FEMA/FIRM maps (Map Name & Date):
☐ 100-year Floodplain Elevation is: (NGVD)
☐ Aerial Photographs (Name & Date):

Land Cover Maps prepared by the GIS component of the ITAM Program and Environmental Division, Fort Drum, NY

¹Wetlands are identified and delineated using the methods and criteria established in the Corps Wetland Delineation Manual (87 Manual) (i.e., occurrence of hydrophytic vegetation, hydric soils and wetland hydrology).

²The term "adjacent" means bordering, contiguous, or neighboring. Wetlands separated from other waters of the U.S. by man-made dikes or barriers, natural river berms, beach dunes, and the like are also adjacent.
